This document is for information purposes only and has no contractual value.

The opening and closing times of the access gate are calculated for the year with an atmospheric pressure estimated at 1013 hPa.

Any variation in atmospheric pressure could lead to a change in gate hours.

Each boater is responsible for navigating their vessel through the channel and should exercise caution throughout the manoeuvre.

Red light : forbidden to enter or leave

Green light : authorisation to enter or leave depending on the draft

When the tidal coefficient is higher than 65 we recommend that you wait 15 minutes after the lights have turned green before entering the channel in order for the current to stabilise.
